Tawasy Shopping

Developed a robust e-commerce platform with distinct user roles and corresponding dashboards. The platform caters to four types of users: Customer, Seller, Vendor, and Admin. My role focused on crafting intuitive, responsive, and user-friendly interfaces as a Front-End Developer.

- Implemented a user-friendly interface that allows customers to shop from various stores, explore product categories, and discover brands effortlessly.
- Enhanced the shopping experience by integrating advanced search functionalities, making it easy for users to find specific items or browse by category, store type, or brand.
- Supported the growth of local businesses by enabling them to become sellers on the platform, providing tools to reach more buyers and expand their market presence.
- Ensured high performance and security of the website by utilizing modern web development practices and technologies.

Technologies Used:

- HTML5, CSS3, JavaScript, Javascript Frameworks React Js , Next Js , Redux / Redux Toolkit
- Responsive design techniques to ensure compatibility across various devices and screen sizes.
- API integration for dynamic content loading and user interactions

Tawasy Delivery

A comprehensive dashboard for Tawasy Delivery to control, observe, and manage drivers, orders, and customers efficiently. This project involved creating dynamic and responsive interfaces using advanced front-end technologies and real-time data tracking mechanisms.

Key Features and Responsibilities:

- **Driver Management:**
 - Designed and developed a driver management interface to monitor driver status, performance, and availability.
 - Implemented real-time tracking of drivers using WebSocket for immediate updates and efficient driver assignment.
- **Order Tracking and Management:**
 - Created an intuitive order tracking system that allows administrators to monitor and manage orders in real-time.
 - Developed features for assigning direct orders to drivers, ensuring timely and efficient deliveries.
- **Customer Administration:**
 - Built a customer management interface to handle customer information, order history, and support inquiries.
 - Ensured data integrity and security in customer-related operations.
- **Real-Time Communication:**
 - Integrated Pusher-JS library for real-time updates and notifications, enhancing the responsiveness of the dashboard.
 - Utilized WebSocket for continuous real-time data flow between the server and the dashboard.

Technologies Used:

- **Frameworks/Libraries:** Next.js, React.js
- **Styling:** Tailwind CSS for modern and responsive design like MaterialUI and NextUI
- **State Management:** Redux Toolkit for efficient state management
- **Real-Time Data:** Pusher-JS library with Pusher as a provider for real-time updates

16/07/2024 – 25/07/2024
Home More Ecommerce
